

RONALDO SIERRA VILORIA

· Sincelejo, Sucre, Colombia · [Portafolio](#) · [LinkedIn](#) · +57 300 4207462 · sierraviloria10@gmail.com

Junior Data Analyst with experience in BI solutions and automation. Proficient in SQL, Python programming language, Microsoft Excel, Power BI, Google Looker Studio, Google Sheets, Statistics, and Amazon Web Services (AWS). Experienced in developing ETL (Extract, Transform, Load) processes, data processing and integration from diverse sources, and data visualization, creating interactive and functional dashboards.

PROFESSIONAL EXPERIENCE

Freelance Project – Data pipeline automation in AWS

Sincelejo, Colombia

Data Analyst

May 2026 – In Development

- I designed and implemented a data ingestion flow from a web interface to upload Excel files.
- I automated data processing with AWS services, including Lambda, S3, Glue, and Athena.
- Standardize information in a parquet format to improve the efficiency of consultation and analytical preparation.
- I integrated the output with Power BI to simulate an automated dashboard with data updates.
- I worked with cloud-oriented architecture to reduce natural processes and centralize information analysis

Freelance Project – Digital Campaign Optimization A/B Testing - Python

Sincelejo, Colombia

Data Analyst

Apr. 2026 – May. 2026

- Methodology: Z-Test of Proportions, Statistical Power Analysis ($\alpha = 0.05$, $1 - \beta = 0.80$).
- I designed and evaluated a large-scale A/B experiment in Python to validate the performance of a new advertisement against the baseline control campaign.
- I performed a two-proportion Z-test which confirmed conclusive statistical significance ($p < 0.05$), ensuring that the increase in conversions was not due to chance.
- **Business Impact:** I translated the results into a projected financial return of +7,692 additional sales by comparing the performance of both campaigns.

EDUCATION

Caribbean University Corporation CECAR

Systems Engineering– Graduation process (October 2026)

Sincelejo, Colombia

2020 - Currently

TECHNICAL SKILLS

- **Programming languages:** Python, JavaScript, PHP
- **Visualization tools:** Power BI, Looker Studio.
- **Data cleansing & ETL:** Power Query, ETL (Extract, Transform, Load), Power Pivot, Pandas, NumPy, Matplotlib, Seaborn
- **Databases:** PostgreSQL, SQLite, MySQL, SQL Server, MongoDB
- **Cloud Computing:** AWS (Amazon Web Services), S3, Buckets, Athena
- **Languages:** Intermediate English B1.1
- **Statistics:** Exploratory Data Analysis (EDA), A/B Testing, Testing and Hypothesis

CERTIFICATIONS

- **Google Analytics**– Skill Shop 2025-2026
- **Advanced Microsoft Excel**– Digital Training Program Connect Empleo 2025
- **Microsoft Excel: Data Analysis**– Udemý 2025
- **Power BI**– Ministry of Information and Communication Technologies and its Digital 2025 Directorate
- **Exploratory Analysis with Python**: SENA 2025
